## SUMMARY

Enthusiastic engineering student with a strong foundation in **backend development** and **machine learning**. Skilled in designing **scalable systems**, optimizing **ML models**, and delivering reliable solutions. Seeking a **Backend Engineer** role to apply technical expertise, solve complex problems, and contribute to innovative *AI-driven products*.

## EDUCATION

**Vellore Institute of Technology, Bhopal**

Bhopal, MP

*B.Tech in Computer Science & Engineering (AI & ML)*

*Sep 2023 – Present*

- Current CGPA: **9.1/10.0**
- Relevant Coursework: Machine Learning, Data Structures, Algorithms, Computer Networks, Database Management.

## WORK EXPERIENCE

**AICTE Edunet (IBM)**

Remote

*Machine Learning Intern*

*Jul 2024 – Aug 2024*

- Designed and deployed a **fake news detection system** on **IBM Cloud** using Scikit-learn, achieving **95%+ accuracy** through optimized ML pipelines.
- Built end-to-end workflows for **data preprocessing**, **supervised learning**, **AI automation**, and **cloud deployment**, improving model scalability and reliability.

## KEY PROJECTS

**AgriProject – FarmFlow:** Architected a microservice-based agriculture platform with **Spring Boot** (120+ REST APIs) and Python ML models (**95%+ accuracy**). Integrated Eureka discovery, **Docker Compose**, JWT/OAuth2 security, role-based access, and Caffeine caching for high performance.

**Kubernetes Monitoring System:** Designed a two-tier application deployed on **Docker/Kubernetes** clusters with **2 pods**, scalable up to **300%** via Horizontal Pod Autoscaling. Integrated **Grafana** dashboards for real-time CPU/memory monitoring and proactive resource optimization.

**E-Commerce Platform:** Developed a robust full-stack e-commerce app with **Spring Boot** and **Thymeleaf**. Implemented **role-based access** (admin/user/seller), email verification, and automated notifications to improve UX.

## TECHNICAL SKILLS

- **Backend:** Spring Boot, REST APIs, Microservices, Hibernate, Eureka Cloud
- **Languages:** Python, Java, C++, JavaScript, HTML/CSS
- **ML & Data Science:** Scikit-learn, Pandas, NumPy, Matplotlib, CNN
- **DevOps & Tools:** Docker, Kubernetes, Git, GitHub, GitLab CI/CD, Grafana, AWS (Basics)
- **Databases:** MySQL, SQL
- **Frontend:** React, Thymeleaf

## CERTIFICATIONS

**Oracle Certified Professional – Java SE 17 Developer** (Nov 2025) 323734645OCPJSE17

**NPTEL CloudA Computing (Top 5%):** NPTEL25CS11S1042801742

**Oracle Cloud Infrastructure 2025 Gen AI Professional:** 321295730OCI25GAIOCP

## ACHIEVEMENTS & EXTRACURRICULARS

**Smart India Hackathon 2023 – College Finalist:** Led ML model development and database design for a women's safety solution featuring **real-time anomaly detection** and **gender recognition**; selected among **400+ teams**.

**Project Exhibition Lead – Fake AI Detector:** Developed an advanced ML-powered **fraudulent audio detection** system; handled backend architecture, model integration, and deployment.

**Treasurer – Toastmasters Club:** Managed finances for a 25-member club, ensuring **100% dues collection**, transparent accounting, and accurate budgeting across a **2.5 lakh** fund.
